Allowable Subject Matter

This communication is in response to applicant's amendment which is filed November 4, 2005.

The proposed amendment has been entered and made of record. Claims 1, 5 and 12 have been amended to more particularly point out and distinctly claim the invention.

Applicant's amendment with respect to the pending claims 1-23, filed November 4, 2005, places the application in condition for allowance.

Claims 1-23 are allowed as evident by applicant's amendment and argument.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a method and a system includes a control logic in communication with the receiver section, the transmitter, the at least one user activation input and the memory, for each channel the control logic maintaining a channel mode set initially to a rolling code mode, the channel mode changing to one of the at least one fixed code mode if the channel is trained to a fixed code in response to receiving a signal transmitted from an existing transmitter, the control logic in response to an assertion of the user activation input associated with the channel generating and transmitting an activation signal based on each transmission scheme associated with the mode maintained for the channel.
